

# Tactical Emergency Casualty Care (TECC)

The 2<sup>nd</sup> edition of NAEMT's **Tactical Emergency Casualty Care (TECC)** course teaches EMS practitioners and other prehospital providers how to respond to and care for patients in a civilian tactical environment.

The course presents the three phases of tactical care and integrates parallel EMS nomenclature:

- Hot Zone/Direct Threat Care that is rendered while under attack or in adverse conditions.
- Warm Zone/Indirect Threat Care that is rendered while the threat has been suppressed but may resurface at any point.
- Cold Zone/Evacuation Care that is rendered while the casualty is being evacuated from the incident site.

The 16-hour classroom course includes all new patient simulations and covers the following topics:

- Hemorrhage control including immediate action drills for tourniquet application throughout the course;
- Complete coverage of the MARCH assessment;
- Surgical airway control and needle decompression;
- Strategies for treating wounded responders in threatening environments;
- Caring for pediatric patients;
- Techniques for dragging and carrying victims to safety; and
- A final, mass-casualty/active shooter event simulation.

**Participants should be prepared for a hands-on, interactive course.**

**WHEN:** January 31-February 1, 2023 08:30-17:00  
Both days must be attended to receive credit.

**WHERE:** Emergency Services Training Center  
1705 W 2nd Ave  
Eugene, OR 97402

**COST:** \$99

**CLASS SIZE:** Limit 20 Students
