

Incident Safety Officer

F0729

“Incident Safety Officer.” This two-day course examines the Safety Officer’s role at emergency responses. This course focuses on operations within an Incident Command System (ICS) as a Safety Officer and emphasizes response to all-hazards types of situations.

This course is designed for fire and Emergency Medical Services (EMS) responders who may be designated by the Incident Commander (IC) as an ISO while working within an Incident Command System (ICS). These assignments may occur during firefighting, EMS, special operations-type incidents, and training evolutions.

The goal of this course is to provide students with the knowledge and skills needed to perform the duties of the Incident Safety Officer (ISO) during incident operations and training evolutions. This course is an incident-specific, scenario-oriented course designed to teach students what an ISO needs to know at an incident. The course uses instructor-led discussion, multimedia activities, and small group discussions to convey instructional points.
